Lila Papazian

React Senior Front-End Developer at Blue Alba
Argentina

Experience

Blue Alba

React Senior Front-End Developer

April 2021 - Present (3 years 6 months)

Key Responsibilities

Develop and integrate new features into web applications, ensuring a seamless user experience.

Maintain and improve code quality by refactoring and adding comprehensive tests when feasible.

Add components to company-owned component libraries, ensuring seamless integration with Storybook for better documentation and visualization.

Utilize Jest to add unit testing to key frontend functions, focusing on custom hooks to ensure reliability and maintainability.

Collaborate with cross-functional teams to design solutions that smoothly integrate frontend and backend technologies.

Achievements

Championed the adoption of modern technologies like React Query and Zustand, leading to more efficient data management and network usage.

Successfully implemented numerous feature enhancements, contributing to increased user engagement and satisfaction.

Scheduled to present a workshop on React Query, sharing insights and best practices with peers

Skills and Collaboration:

Proficient in frontend technologies with a strong focus on React and modern JavaScript libraries.

Thrive in a collaborative team environment, consistently working with colleagues to design and deliver integrated solutions.

Despegar

Web Developer

October 2018 - April 2021 (2 years 7 months)

Key Responsibilities

Reengineer legacy code into a modern, modular architecture using React v16, React Hooks, and Typescript.

Add new features that allow our clients to self-manage their reservations within the platform.

Maintain legacy code using Angular.js and Javascript while migrating to a new architecture.

Implement fully styled components from an internal library to avoid duplicating code and maintain branding.

Refactor of legacy code when feasible, implementing unit testing for key functionalities and applying DRY and KISS practices.

Achievements

Improved system availability and loading time, leading to better results on client satisfaction surveys.

Reduced amount of calls from clients to resolve standard issues with reservations.

Skills and Collaboration

Great communication skills with other teams leading to faster response times to tickets issued by the call center operators.

UTN Buenos Aires

Ad honorem Assistant Professor for System Design
February 2019 - March 2020 (1 year 2 months)

UTN Buenos Aires

Ad honorem Assistant Professor for Higher Math
February 2016 - January 2018 (2 years)

Education

Universidad Tecnológica Nacional
Analista Universitario de Sistemas

Coderhouse

UI/UX Course · (December 2020 - April 2021)
